

Lab 2 Exercises

Assignment No 1.

1. JSX Syntax Exercise: You need to use `<div>/<h>` (including `h1, h2...`) `/<p>` to construct a basic HKUST(GZ) Course Platform. The Platform should include:
 - (1) Features courses, including a **course named “Creative Prototyping”**.
 - (2) Course-item, including course **duration, instructor, classroom** and so on.
 - (3) System notices, including **course selection reminder** and **student orientation date**.

The final interface should be like the Figure 33 shown.

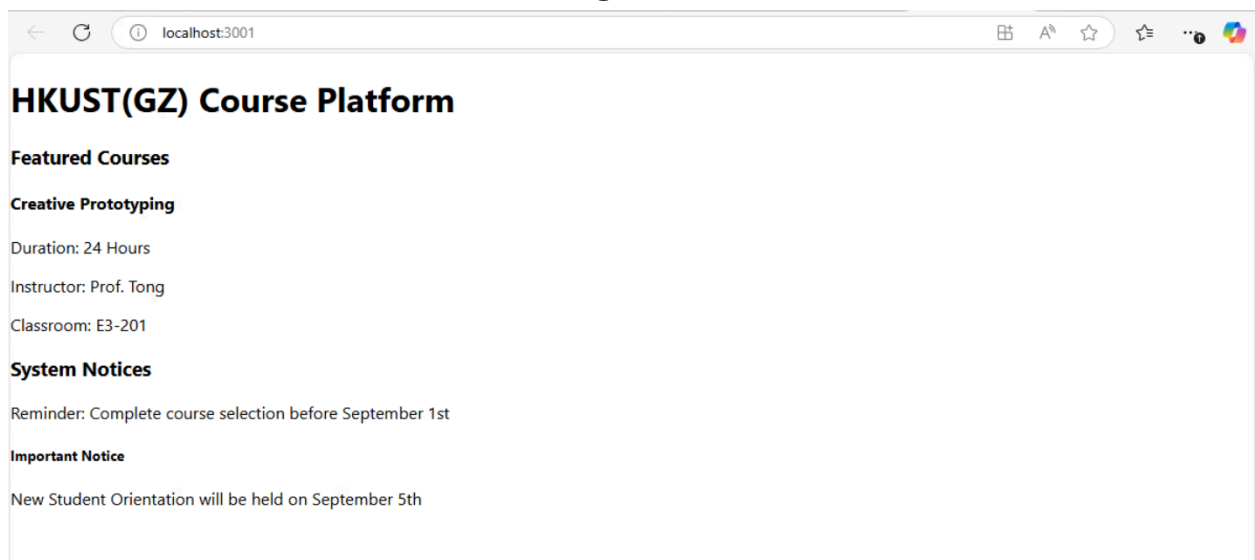

Figure 33: The HKUST(GZ) Course Platform.

2. Component-based Thinking: Transfer the course-item as a function `Course` in `course.js`. Import and use it in the `App.js`.
3. State Change: Add two buttons under the course-item (“-” & “+”). At the bottom, add a sentence that “There are {number} students choosing the courses”. When the “-” or “+” button is pressed, the number below will change accordingly.

The final interface should be like the Figure 34 shown.

HKUST(GZ) Course Platform

Current Time

Server Time: 1:35:06 PM

Featured Courses

Creative Prototyping

Duration: 24 Hours

Instructor: Prof. Tong

Classroom: E3-201

System Notices

Reminder: Complete course selection before September 1st

Important Notice

New Student Orientation will be held on September 5th

There are 29 students choosing the courses.

Activate Windows
Go to Settings to activate Windows.
